eROSITA Hard- and Software

1	Brunner	Hermann	Simulating the eROSITA all-sky survey: exposure, sensitivity, and source detection strategies
2	Freyberg	Michael	Calibration of eROSITA, on-ground and in-orbit
3	Guglielmetti	Fabrizia	The Background-Source separation algorithm - A feasibility study for the eROSITA mission
4	Kreykenbohm	Ingo	The eROSITA pre-processing and NRTA software
5	Lamer	Georg	eROSITA source detection and sensitivity
6	Perinati	Emanuele	The radiation environment in L-2 orbit :implications on the non-X-ray background of the eROSITA pn-CCD cameras
7	Schmid	Christian	Simulated eROSITA Sky
8	Wille	Michael	Recognition of bad pixels on charge-coupled devices in the eROSITA Near Real Time Analysis

Galaxy Clusters and Cosmology

9	Borm	Katharina	Expected Properties of eROSITA Galaxy Clusters
10	Borozdin	Konstantin	Studying Dark Energy with eRosita
11	Burenin	Rodion	Cosmological parameters from the measurements of galaxy cluster mass function in combination with other cosmological data
12	de Hoon	Arjen	Distant clusters of galaxies
13	Giodini	Stefania	Galaxy groups and clusters in CFHTLS
14	Hamana	Takashi	Subaru weak lensing cluster survey
15	Khosroshahi	Habib	Fossil galaxy groups; observations and simulations
16	Lagana	Tatiana	Star formation efficiency in galaxy clusters and constraints on the matter density parameter
17	Lovisari	Lorenzo	Scaling relations with a complete sample of galaxy groups
18	Mirkazemi	Seyed Mohammad	XMM-CFHTLS and RASS-SDSS Galaxy Clusters Surveys
19	Nuza	Sebastian	Radio relics in X-ray galaxy cluster samples
20	Raeth	Christoph	Correlating Cosmological Probes using Mutual Information
21	Zandanel	Fabio	A multi-frequency galaxy cluster catalog from the MultiDark cosmological simulation
22	Zhang	Yu-Ying	Where are we in calibrating mass proxies and baryon-mass fraction for cluster cosmology
23	Irshad	Mohammed	Cosmological Constraints from eROSITA

AGN

24	Allevato	Viola	Redshift Evolution of AGN Bias and Subdominant Role of Mergers in Triggering Moderate Luminosity AGN at Redshifts up to 2.2
----	----------	-------	---

25	Brusa	Marcella	Host galaxies properties of bright AGN: prospects for eROSITA
26	Cappelluti	Nico	X-ray sources clustering with e-ROSITA: the ultimate experiment for AGN evolution
27	Fotopoulou	Sotiria	The Ultra Hard X-ray luminosity function of AGN
28	Georgantopoulos	Ioannis	Compton-thick AGN in eROSITA
29	Khorunzhev	Georgiy	Comparison of various methods of supermassive black hole mass determination based on a representative sample of nearby AGN
30	Krumpe	Mirko	What can we learn from AGN clustering measurements with eROSITA?
31	Salvato	Mara	Dissecting Photometric redshift for AGN using XMM- and Chandra- COSMOS samples
32	Markowitz	Alex	eROSITA: The Largest Survey of AGN Fe Lines and Absorbers

Galactic Sources

33	Becker	Werner	Supernova Remnants in the eROSITA All-Sky Survey
34	Capelli	Renzo	Astroarcheology of the Galactic Centre region: the past 250 years X-ray life of Sgr A* unmasked by Fe-K reverberation within molecular clouds.
35	Duro	Refiz	Broad iron K α line in Cygnus X-1 simultaneously viewed by XMM-Newton, RXTE and INTEGRAL
36	Freyberg	Michael	The Interstellar Medium with eROSITA
37	Hohle	Markus	Narrow absorption features in the X-ray spectra of isolated neutron stars
38	Iyudin	Anatoli	The potential of eROSITA morphological studies of extended supernova remnants
39	Khabiullin	Ildar	X-ray lines formation in the spectrum of SS433 jets
40	Klochkov	Dmitry	Luminosity-related spectral changes in accreting pulsars: indication of two accretion regimes
41	Krivonos	Roman	Galactic diffuse emission
42	Mancini Pires	Adriana	Population synthesis of thermally emitting isolated neutron stars - Expectations with eROSITA
43	Nagel	Thorsten	Spectral modeling of accretion disks in compact binaries
44	Rauch	Thomas	DA-type White Dwarfs: Soft X-ray Standards for the Calibration of X-ray Instruments
45	Rauch	Thomas	X-ray Model-Atmosphere Spectra of Extremely Hot, Compact White Dwarfs - Access via the Virtual Observatory Service TheoSSA
46	Rauch	Thomas	The Chemical Evolution of Novae During Outbursts
47	Robrade	Jan	eROSITA and the solar neighborhood - nearby stars in X-rays
48	Robrade	Jan	Massive stars as seen with eROSITA
49	Rutledge	Robert	Isolated Neutron Stars with eROSITA

50	Sazonov	Sergey	Spun-up stars and the X-rays from Sgr A*
51	Suleimanov	Valery	Cooling tail method for X-ray bursting neutron star masses and radii determination
52	Traulsen	Iris	X-ray spectroscopy of highly magnetic cataclysmic variables during the eROSITA pointed phase
53	Doroschenko	Viktor	Two component spectrum of X Per

Other Galaxies

54	Bogdan	Akos	The Curious Case of NGC 4342, an Optically Faint but Unusually Gas-Rich Early-Type Galaxy
55	Ducci	Lorenzo	X-ray source population study of the starburst galaxy M83
56	Kavanagh	Patrick	XMM-Newton Observations of the N206 Superbubble in the LMC
57	Sturm	Richard	The Small Magellanic Cloud in the eROSITA survey
58	Warth	Gabriele	Studies of the hot interstellar medium in the Large Magellanic Cloud

Future Missions

59	Khosroshahi	Habib	Iranian National Observatory Project
60	Tsunemi	Hiroshi	Formation Flight Astronomical Survey Telescope (FFAST)
61	Hudec	Rene	The Perspectives of LOBSTER X-Ray Monitors
